

In the centuries immediately preceding the birth of Christ, geometry, astronomy, physics, anatomy, mathematics, grammar and other disciplines flowered in a nurturing matrix of Greek rationalism mixed with fructifying elements from Egyptian, Jewish, Persian, Syrian, Indian, African and other cultures. The result was one of the most fertile and influential periods in Western intellectual history. In this monumental study, a noted scholar focuses on this era, painting a broad picture that emphasizes science but also includes ancient arts and letters, since as Professor Sarton notes, We could never understand Hellenistic culture without their gracious presence.
