

Estelle Prebilica, the daughter of devout Croatian immigrants, is desperate. She's abandoned the tenets of her strict, old-world upbringing to pursue a forbidden outsider, and now her husband is gone and her parents are dead. With no place to go, she turns to the person she hates most, her mother-in-law—the Madam of a thriving brothel. The naive teenage mother stumbles headlong into a terrifying journey through the lurid world of organized crime—drugs, prostitution, and murder. Her escape drives her into the arms of the charismatic Jerry Bradley and finally the mysterious Frank Moretti, but is it rescue or a trap more dangerous than the one she left behind? As her life spirals out of control, Estelle drags her innocent children along with her. Can anything stop the fall?

Any object that is being acted upon only by the force of gravity is said to be in a state of free fall. There are two important motion characteristics that are true of. Noun. freefall (uncountable) (physics) The state of being in a motion affected by no acceleration (force) other than that provided by gravity. (common usage) The state of falling with no interference from outside forces other than the air resistance (no open parachute, etc.).

In Newtonian physics, free fall is defined as the motion of an object where gravity is the only force acting upon it. By this definition then, a skydiver is never in true free fall, even before they deploy their parachute.

free fall definition: 1. an occasion when something or someone falls quickly under the influence of gravity 2. the process of failing or losing value or strength.

Free-fall, in mechanics, state of a body that moves freely in any manner in the presence of gravity. The planets, for example, are in free-fall in the gravitational.
